The meaning of the Logos

Basically, I am fascinated by the Trinity.

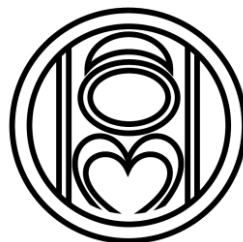

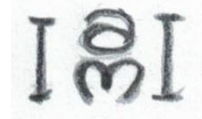

The number 3 and the combination of 3 has a powerful effect on me. For example: **body-mind-soul**

In Christian theology, the Trinity (Latin: trinitas, trias, German: three-number, threeness) is the essential unity of God in three persons: Father, Son and Holy Spirit. This simultaneously expresses their distinction and their indissoluble unity.

Other religions also have ideas of triads, of divine trinities, such as in ancient Egyptian religion with Osiris, Isis and Horus. Hinduism knows the Trimurti of Brahma, Vishnu and Shiva.

My logo emerged intuitively from a meditation.
It also has three meanings.

1. a) circle = unity
b) I am I = I AM consciousness
2. a) Circle = integration, wholeness of being
b) The two vertical bars embody duality, the feminine and masculine principle
c) The middle part is abstracted from top to bottom;
Flat sickle = A for **ART**
Oval = O for **OF**
heart shape = **HEART**
3. a) Circle = perfection, a symbol of the union of conscious and unconscious.
b) Two rising verticals = Ying & Yang,
c) stylized OM symbol = Holy syllable, primordial sound of the symbol of power of the divine and the trinity
